

## 18-port Gigabit Uplink PoE Switch

### OVERVIEW

16\*10/100M PoE ports and 2\*10/100/1000M uplink RJ45 ports, Port 1-16 can support IEEE 802.3af/at standard PoE power supply, single port PoE power up to 30W, and the maximum POE output power less than 250W. As a PoE power supply device, it can automatically detect and recognize the power receiving equipment that meets the standard and supply power through the network cable. It can supply power to POE terminal equipment such as wireless AP, webcam, VoIP phone, video access control intercom, etc. through network cable to meet the network environment that needs high-density PoE power supply. It is suitable for hotels, campuses, factory quarters and small and medium-sized enterprises to form an economy. Efficient network.

Unmanaged model, plug and play, no configuration, easy to use.

## FEATURE

### ■ 10/100M access, Gigabit uplink

- ◇ Provides 16\*10/100M PoE ports and 2\*10/100/1000M RJ45 ports for flexible networking and meets the networking requirements of various scenarios.
- ◇ Support non-blocking wire-speed forwarding and transmit more smoothly.
- ◇ Support full duplex based on IEEE802.3x and half duplex based on Backpressure

### ■ Intelligent PoE power supply function

- ◇ 16\*10/100MBase-TX RJ45 ports support PoE power supply, meeting the needs of security monitoring, teleconferencing system, wireless coverage and other scenarios.
- ◇ Comply with IEEE 802.3af/at PoE power supply standard, automatic identification of PoE equipment for power supply, no damage to non PoE equipment. The maximum PoE output power is 250W, and the maximum PoE output power of single port is 30W.
- ◇ The PoE port supports priority mechanism. When the residual power is insufficient, the power supply of high priority ports is guaranteed, so that the equipment is overloaded.

### ■ Easy to use

- ◇ Plug and play, no configuration, simple and convenient.
- ◇ With function switch, port 9-16 can support 10M/250 meters long distance transmission mode when one key is opened.
- ◇ The user can easily understand the working status of the device through the power indicator (Power), port status indicator (Link), and PoE operation indicator (PoE).
- ◇ Support desktop and 1U-19 inch cabinet installation.

### ■ The equipment is stable and reliable

- ◇ The host has low power consumption, no fan mute design, and metal case to ensure stable operation of the product.
- ◇ ONV's self-developed power supply, high redundancy design, provides long-term stable PoE power output.
- ◇ The equipment meets the national CCC standard and is in full compliance with the safety requirements of CE, FCC, and RoHS. It is safe and reliable to use.
